EXPIRATION DATE: August 28, 1991

Gentlemen:

We have completed our review of the above-referenced project. Based on the information you supplied, we concur that the project is a low-hazard structure. As a result, we are approving the plans pursuant to Section 73-5a of the Utah Code Annotated 1953, as amended. In order for the approval to remain valid, the conditions outlined in the following paragraphs must be complied with:

1. The names and qualifications of the inspectors for the project.
2. The name of the contractor for the project, including the name of the contractor's representative(s) responsible for the project.
3. The estimated starting and completion dates for the project.

During the construction phase, the following information must be submitted to the State Engineer for review:

1. Results of all material tests undertaken should be submitted on a weekly basis.
2. Copies of daily inspection reports should be submitted weekly with the material test reports.
3. Documentation of any major change in construction practices or materials must be submitted, in writing, and approved prior to their use.

Before the dam can be placed in operation, the following condition must be met to obtain final approval to store water:

1. The State Engineer's office must be notified of, and involved in, a final inspection of the project that involves all interested parties.

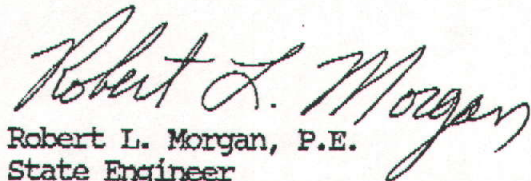

Within 60 days of the completion of the project, the State Engineer should be supplied with a final set of mylars that represent the "as-constructed" project. Failure to provide such plans may cause the State Engineer to rescind his approval of the project.

This Decision is subject to the provisions of Rule R625-6 of the Division of Water Rights and to Sections 63-46b-13 and 73-3-14 of the Utah Code Annotated, 1953 as amended, which provide for filing either a Request for Reconsideration with the State Engineer, or an appeal with the appropriate District Court. A Request for Reconsideration must be filed with the State Engineer within 20 days of the date of this Decision. A court appeal must be filed within 30 days after the date of this Decision, or if a Request for Reconsideration has been filed, within 30 days after the date the Request for Reconsideration is denied. A Request for Reconsideration is considered denied when no action is taken 20 days after the Request is filed.

Please note that the expiration date of this permit is August 28, 1991.

If you have any questions or need further clarification, please feel free to contact me or Richard Hall of our Dam Safety Section.

Sincerely,

Robert L. Morgan, P.E.  
State Engineer
